

UNDER CONSTRUCTION

Lilac bridge to close for summer months

The Lilac Avenue pedestrian bridge in Rialto will be closed this summer for improvements, starting June 19. The bridge opened early to provide safe passage for Kolb Middle School students and other walkers at the beginning of the school year. The early opening also allowed construction of the Cactus bridge, which was completed this spring.

Now that the school year has ended, crews will return to complete fencing, lighting, drainage and sound wall improvements along the Lilac bridge. Walkers may use Cactus as an alternate route. Work is set to end before school starts again in late August.

The Lilac Avenue pedestrian bridge in Rialto will close this summer for lighting, drainage and other improvements. The bridge should reopen in late August.

Lilac, Casmalia intersection to close week of June 26

The intersection of Lilac Avenue and Casmalia Street will be closed for about three days the week of June 26 for drainage improvements.

Work will be performed during the day and then covered at night by steel plates. Signs will be posted prior to the closure of the intersection.

State Street storm drain work kicks into high gear

Construction crews will be tunneling under a major water line next week for the State Street storm drain project in San Bernardino. This massive storm drain is being built as part of the Route 210 project and will help with both freeway and local street drainage in the area.

State Street is closed between Highland Avenue and Adams Street for the placement of curbs, gutters, inlets, seven-foot diameter pipe and smaller connecting pipes.

Later this year, pipe will be installed beneath Highland Avenue between California Street and State, and along California Street north of Highland. During the work on Highland Avenue, motorists will be shifted to the newly paved northern portion of Route 210 so that crews can work safely. Soft soil conditions will prevent drivers from using this section of Highland Avenue while work is underway. Work is expected to be complete by early spring.

Dirt hauling to continue until mid-July

Construction crews will be moving dirt from west to east along the freeway corridor during the next month, which will require traffic flagging on Highland Avenue in San Bernardino.

Crews are moving dirt from the Vulcan Materials plant to fill in areas near Interstate 215 between 27th Street and Highland.
